Acquisition of Veteran's Services Telephone Key System

Dear Members of the Board:

The telephone services for the Veterans' Service Offices of the County of Santa Cruz has been provided by a used Comdial key system since 1992. This key system has recently experienced problems, and the current service vendor has informed the County that they no longer provide maintenance for Comdial equipment. The search for a new vendor proved unsuccessful.

In order to protect the Veterans' Service Office from any interruption in telephone service in the event of a telephone system failure, it appeared urgent that a new system be purchased. As it is not cost effective to include these offices in the County's Siemens/ROLM telephone network, a Toshiba Key System was obtained by Totlcom, an established County vendor, at a cost of \$8,300. Funds for the new system are available in savings from the POSCS Live Oak Swim Center switch installation project.

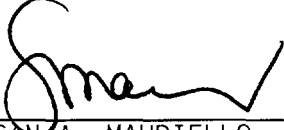

It is RECOMMENDED that your Board ratify the purchase and installation of a Toshiba key system with voice mail for the Veteran's Service office and approve a re-alignment of the fixed asset appropriations within the Information Services/Telecommunications 1997-98 budget as summarized on the attachment.

Very truly yours,

-Kenneth D. Wedderburn
Information Services Director
