Status Report on Emergency Management Plan

Dear Members of the Board:

On April 13, 1999 your Board received a status report on the development schedule of the County's emergency management plan, specifically the addition of planning elements related to the statewide Standardized Emergency Management system (SEMS) and crisis/consequence management. At the time of that report, staff anticipated that the plan draft would be ready for presentation to your Board after review by the County Disaster and Operational Area Councils and the County Administrative Officer in late May.

Due to scheduling and workload issues among the response entities, additional time will be necessary to complete the review of the draft plan and incorporate the input from all participants. Staff anticipate that the draft document will be available for presentation in early September, allowing adequate time for all participating agencies and departments to review in consideration of their respective planning efforts.

It is therefore **RECOMMENDED** that your Board file this status report on the local emergency management plan development and direct the General Services Department - Emergency Services Division to return with the recommended plan document on or before September 21, 1999.

Very truly yours,

Roy K. Holmberg
General Services Director
