Status Report on Emergency Management Plan

Dear Members of the Board:

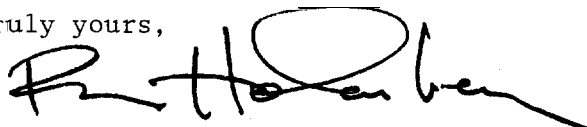

On September 21, 1999, your Board received a status report on the development schedule of the County's emergency plan. At that time, staff anticipated that the plan draft review would be completed by appropriate County departments and associated response agencies by today's meeting.

However, due to the heightened work activity this past few months associated with the Year 2000 transition, additional time is necessary for the planning document to finish the review process. The County Disaster Council has reviewed part one of the draft plan, and will be acting upon the final draft at their March meeting. Given ongoing workload demands among the County departments having integral response roles and the time necessary to complete their various reviews, staff anticipate that the document will be available for presentation by your Board's second meeting in April.

It is therefore recommended that your Board file this status report on the local emergency management plan development and direct the General Services Department - Emergency Services Division to return with the recommended plan document on or before April 11, 2000.
