### AGENDA: MAY 21, 2002

May 10, 2002

SANTA CRUZ COUNTY BOARD OF SUPERVISORS  
701 Ocean Street  
Santa Cruz, California 95060

**SUBJECT: CALIFORNIA DEPARTMENT OF FISH AND GAME  
GRANT APPLICATIONS**

Members of the Board:

Representatives from the Public Works Department, the Planning Department and the Resource Conservation District, have collaborated to prepare grant applications for the California Department of Fish and Game Fishery Restoration Grants Program.

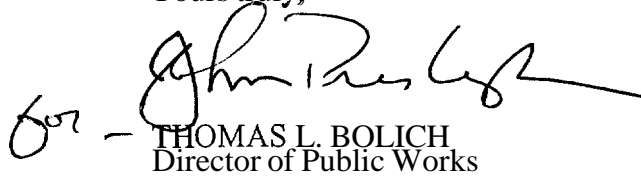

Two applications have been completed for the May 24, 2002, final filing date. One grant is titled "Phase II – San Lorenzo River Road-Related Erosion Assessment and Prevention Project" and requests \$115,228. This project would allow us to complete a sediment source investigation and restoration planning project within the San Lorenzo River watershed. A previous grant funded the assessment of approximately 45 miles of the 165 miles of roads within the watershed; this grant would allow us to perform a complete inventory of the remaining 121 miles of roads.

The second grant application is titled "Engineering for Improved Fish Passage." The grant application will request \$350,000 to support efforts in redesigning existing fish barriers for the purpose of improving or restoring salmon and steelhead migratory patterns. The grant will provide for a three-year program to design up to twelve fish passage improvement projects, and includes training for County engineers in state and federal design criteria for these types of projects.

Approval of the grant application by your Board is required as part of the grant application process. A copy of the Department of Fish and Game Fishery Restoration Grants Program Request for Proposals, as well as draft copies of both proposed grant applications are on file with the Clerk of the Board for your review.

It is therefore recommended that the Board of Supervisors adopt the attached resolution approving submittal of the grant applications.

Yours truly,

 - THOMAS L. BOLICH  
Director of Public Works
