SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This school house was originally located at Twin Lakes and was moved to its present location in the mid-1930's. Although the school population has outgrown the present building and is housed mainly in a large modern building nearby, the little schoolhouse is still used for classrooms and other school related facilities.

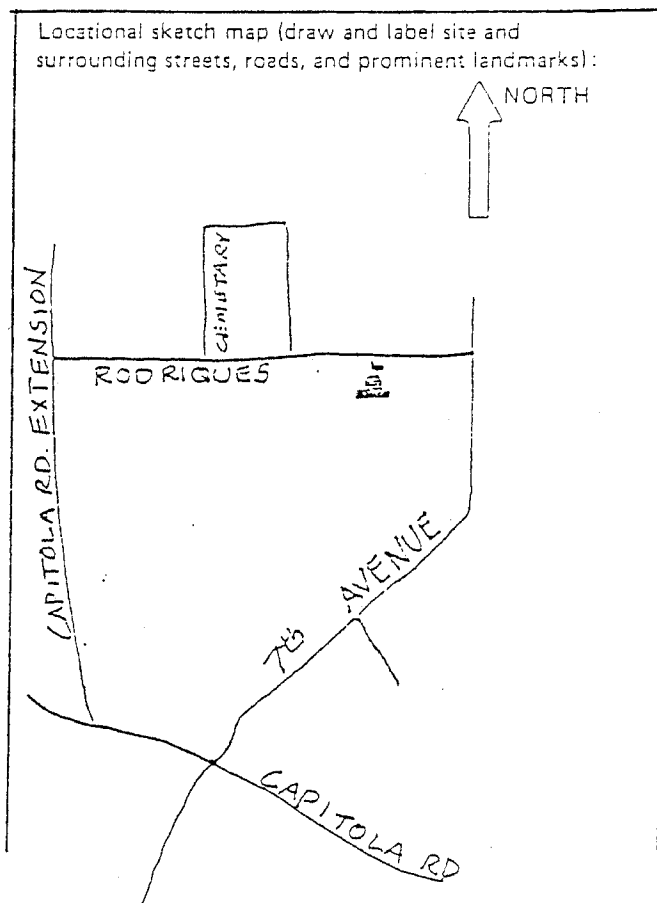

The school is currently operated by the Seventh Day Adventist Association.

This building is significant as the seat of local education for approximately 65 years and for the architectural style which embodies residential elements of classic revival in a public school and is unlike any other school in the area.
