Subject: RE: Preserving Santa Cruz' Skyview Drive-In

Dear Members of the Historic Resource Commission:

We are writing to express our desire to see the Skyview Drive-In facility in Santa Cruz, California saved from demolition by designating it as a Historic Landmark.

The Skyview Drive-In opened in 1949 on 14 acres of reclaimed landfill, and **has** been a fixture in Santa Cruz County ever since. In addition to showing movies on two screens 365 days a year, the site has also been home to a bustling flea market since 1971. Both of these uses for the site provide a significant benefit to this community by providing family entertainment, recycling of goods, affordable commodities such as food, clothing and household items, and a firm link to the entertainment and automotive lifestyle cultures that are unique to America, and California in particular.

While several development proposals for this site have been tabled or rejected in the past for a variety of reasons, there is now a planned sale and redevelopment proposal being considered between Sutter Healthcare and the Skyview Drive-In owner. While we recognize the importance of healthcare facilities in our community and Sutter's interest in expanding facilities at favorable terms, we believe that another, more suitable site can be found in reasonable proximity to Sutter's current location. Additionally, given the Drive-In site's former use as a landfill, we question whether this site is a good choice for a medical facility given the environmental hazards that are likely to surface if the Drive-In is demolished.

In addition to our concerns about the site's suitability for building, we firmly believe that historic sites provide a tangible link to a community's history and are vital elements in the flow of our present day culture. We believe such sites are relevant to a community's image as well as our future, and therefore deserve protection and preservation for generations of citizens.

Any site with a history and community value as rich as the Skyview Drive-In should be looked at for historic and cultural significance before it can be modified, destroyed or changed. Additionally, the rarity of drive-in theatres (only 19 such theatres remain in California, and national numbers have shrunk from a high of over 4600 drive-ins in 1958 to just **383** theatres today) underscores the importance of saving this landmark.

As a leader in this community, we ask you to consider the value of this landmark, and the community's interest in preserving it (with more than 10,000

signatures gathered so far), and to take any appropriate action that can help to preserve the Skyview Drive-In. **As** a key part of Santa Cruz County's culture for more than 60 years, the Skyview Drive-In should continue to thrive, and help to keep our community the uniquely wonderful place we call home.

Sincerely,
Angelina Reed and Eric Richter

Subject: Save the "Santa Cruz Skyview Drive-in" - we need you to officially declare the site a Historical Landmark?

Greetings,

On Monday December 3rd the new Santa Cruz Skyview Drive-in owners will be able to dismantle the drive-in movie screens at the Santa Cruz Skyview theater location. In order to encourage alternative solutions to the loss of one the few remaining pieces of American Culture, please list the property on the 'National Register of Historic Places' before this time, *so* that **CEQA** may be triggered as it applies to historic properties. If I am needed for any reason to ensure this process takes place, or for any other related reason, please don't hesitate to contact me. Below is a brief history and some of the significant email correspondence we have conducted thus far. *Also*, we have available 1000's of signatures from local people who want to preserve the Skyview Drive-in theater for future generations.

Please, postpone the property's development (or tell **us** how we may do *so*) until: 1) we get a qualified individual, such as a professional historian, historic architect, **or** architectural historian, who would research the property and prepare material showing that the property meets one of more of the criteria; 2) that material gets reviewed at a public hearing by the County's Historic Resources Commission, which would make a recommendation to the Board of Supervisors and; 3) the Board would consider the Commission's recommendation at a public hearing and decide to designate the property as historic or not.

Thank **you** in advance,

Jesse Brister

 Subject: Re: Save the "Santa Cruz Skyview Drive-in" Campaign - How do we officially declare the site a Historical Landmark?

Dear Jesse,

If you have not already done *so* I suggest contacting the CA State Historic Preservation Office about getting the properties listed on a state or the national register of historic places. The CA SHPO's website is:
<http://www.ohp.Darks.ca.gov/>

Sincerely,
 Liz Creveling

National Center for Cultural Resources
National Park Service

Jesse,

If there were an EIR, it would have to consider alternatives and address the potential historic significance of the drive-in. The requirements for designating a structure or structures as historic are listed in County Code Chapter 16.42.080 generally. Section 16.42.080(c) lists the actual designation criteria. In brief, the process would be as follows: 1), a qualified individual, typically a professional historian, historic architect, or architectural historian, would research the property and prepare material showing that the property meets one of more of the criteria; 2) that material would be reviewed at a public hearing by the County's Historic Resources Commission, which would make a recommendation to the Board of Supervisors and; 3) the Board would consider the Commission's recommendation at a public hearing and decide to designate the property as historic or not.

If you want more specific information on this process, please contact Don Bussey here in Planning; he is staff to the Historic Resources Commission.

(831) 454-2131 (fax)

Hello Jesse,

I know you are working hard to save the drive-in, and I was thinking that perhaps you would like the email list I have ~~from~~ the online petition I started. Only about 1/4 of the signatures have associated emails, but ~~I'm~~ sure there are over a thousand, maybe more. I've heard Sutter has applied for a permit to dismantle one of the screens due to lead. If the screens could be saved, there are encapsulation treatments available that would satisfy the EPA.

Also, are you connected with Angelina Reed? She has voiced strong support to get a historical designation for the drive-in. If a thousand people showed up on the county's doorstep, I think the impact would be felt. Let me know if you would like the list.

Subject: Save the "Santa Cruz Skyview Drive-in" Campaign - How do we officially declare the site a Historical Landmark?

Steve,

Thank you for giving your time to answer our questions concerning this effort. Since learning that Sutter Health is going to place some of their corporate offices on the site, I assumed that permits/ EIR/etc... had been filed. I am inexperienced when it comes to this process, I am still learning where to look and when to do so for all of the information I deem necessary. Also, I had learned that Sutter's proposal included shutting half of the "drive-ins" theater down first and then the other half to follow at a later date (presumably to lessen any public outcry and social impact to the process).

In response to your reply, "There would be some level of environmental review", and considering the above conditions, would then the potential EIR consider alternatives to the proposed project that would preserve or reuse the historic resource and assess the feasibility of those alternatives? I am asking this as CEQA applies to historic properties when there is a discretionary action associated with an action or a project. For example, if someone applies for a demolition permit, and the local laws allow the permit to be issued automatically, there is no discretion so CEQA review is not triggered. However, if the building is designated and the designation requires the local government to review demolition applications for historic buildings, the project is discretionary and CEQA is triggered. If a proposed demolition is for a replacement project on the site which requires zoning variances or conditional use permits, there is again discretion and CEQA is triggered.

Most importantly, how do we go about having the site become recognized as a historical landmark (including all of the structures on the property)? Is this the most preferable first step to take to initiate the above reference to triggering CEQA as it applies to the historic properties in question? Please divulge any other thoughts you may have pertaining to the matter?

Thank You,

Jesse Brister

Subject: FW: Save the Drive-ins Campaign

Jesse,

11/29/2007

I realized that my previous message to you, shown below, stated that an EIR would undoubtedly be required. I want to correct that.

An

EIR may be required, depending on what a proposal for the site would entail. There would be some level of environmental review, but the level and detail wouldn't be known until after there was a proposal.

Steve

Jesse,

No application has been submitted to the Planning Department for any change of use or new development on

the drive-in site. No permit is needed for the owners to shut down either the drive-in or the flea market use. When and if a new use is proposed there, it undoubtedly would require an EIR, but there is no EIR at this time. The drive-in is not designated as a historic resource, but its potential historic significance would have to be addressed by an EIR.

LOCAL: Flea market's last day will be Nov. 25

JONDI GUMZ
 SENTINEL STAFF WRITER

SANTA CRUZ — Put a "sold" sign on the Skyview Drive-In and flea market.

The sales agreement, pending since April, has been finalized, according to an announcement issued Monday by the buyer, the foundation that runs Sutter Maternity & Surgery Center and the Santa Cruz Medical Foundation.

Foundation officials declined to state how much they paid for the property, long

owned by the Martins family. The 14.4-acres at 2260 Soquel Drive had been assessed at just under \$1 million.

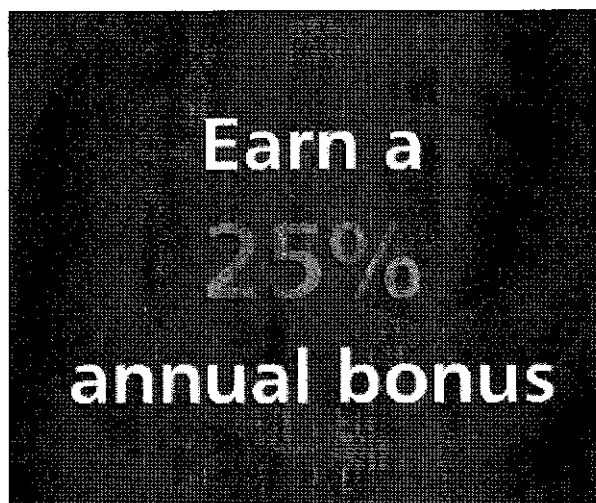

"We are thrilled to acquire a property that will enable our organization to grow in ways that will help meet the community's health care needs for generations," said Dr. Larry deGhetaldi, president of the Santa Cruz division of the Palo Alto Medical Foundation. "We will now begin to evaluate what kind of health care services and what type of facility will most benefit the community at that site."

Sutter has about 135 doctors and serves about 100,000 patients in the county; it also operates the Visiting **Nurse** Association of Santa Cruz.

The family **partnership that had** owned the drive-in property plans to close the theater and flea market. Shutdown dates will be Nov. 25 for the flea market and Dec. 2 for the drive-in.

Flea market devotees say they have gathered 20,000 signatures in hopes of keeping the weekend event open, saying it has economic and environmental benefits.

I think there's money to be made," said former Capitola Mayor

DOMINICAN SEEKING OK TO EXPAND

The Dominican Medical Foundation announced Monday that plans to build a two-story medical office on the Dominican Hospital property at 1555 Soquel Drive are undergoing county review.

The goal is to build in 2010, said Patrick Peer, executive director of the Dominican Medical Foundation, the doctors' group formed in July.

The proposal is for a 44,000-square-foot office for primary care and specialty services, with a parking garage. The architect is Boulder and Associates, which designed the Muir Orthopaedic Center in Walnut Creek. The project has the approval of Catholic Healthcare West, Dominican's parent organization.

"There's an urgent need for access to primary care," Peer said.

Dominican already has a project at 2018 Mission St., Santa Cruz, to turn the former Carpo's restaurant into a 6,000-square-foot office for primary-care physicians. Plans are to relocate doctors to that space by February or March and, during the next three years, recruit five family practitioners.

Next

Pop out

Dennis Norton, noting the attendance of roughly 20,000 a weekend, a \$2.50 admission fee and 200 vendors selling stuff that might otherwise end up in the county landfill.

[Add](#)

The flea market supporters, while enthusiastic, lack a formal organization to manage the venue.

[File To Ma](#)
www

Norton and Mike Alperin, who started the Save the Flea petition online, envision working with an established nonprofit to keep the venue open for at least a year while searching for an alternate site.

[File Ro Bel and](#)
www

The foundation seemed to leave the door open for that possibility.

"We understand the popularity of the current flea market and respect the feelings of the many county residents who would like to see it remain open," said foundation spokesman Ben Drew. "We did look into several options to keep the flea market operating, but were not able to make it work. Regrettably, due to numerous liability issues, including substantial liability insurance costs, we cannot operate a flea market at the site.

[De Fin De Exj Dex](#)

"We encourage others to assess whether or not this might be a good business opportunity for them to pursue. If a governmental agency or other qualified nonprofit organization can suitably address the liability issues and assume the associated liability insurance costs, then we would be willing to look into allowing short-term use of the site for a flea market."

[File Sm she exp](#)
www

The future use of the property has not been announced, though the Sutter organization noted its ongoing effort to recruit primary-care doctors and specialists to address the physician shortage in the area. The group recently completed a strategic planning process focused on the long-term health care needs of Santa Cruz County residents, and expects to add 50 to 60 physicians during the next decade.

[File Fin too box](#)
www

"The acquisition of this property will allow us to look at providing additional medical office space for physicians, as well as additional diagnostic services and expanded hospital services for the community," said deGhetaldi, chief executive officer of Sutter Santa Cruz.

He has talked about creating a "Mayo of the West" and the proximity of the Soquel Drive location to the existing maternity and surgery center at 2900 Chanticleer Ave. creates the potential for developing an integrated campus that links hospital and ambulatory services.

But he declined to provide a timetable, saying he looks forward to "working with the county and the community" to develop the site.

Attorney John Christian, who represented the Martins family partnership, said they are "pleased the property will be used by a not-for-profit organization for the purpose of serving the future health care needs of the community."

Enigma

11/12/2007 6:47 PM

Well, I guess we can kiss goodbye to one of the last remaining Drive Ins on the west coast. Good job Sutter!

While I am at it, I heard a rumor that the site might have been the location of an old landfill or dump. Anyone know about this or if it was, was it buried (no pun intended) for the convenience of the purchase?

Moondust

11/12/2007 7:10 PM

I heard it was the site of an ancient sacred Indian burial ground. I think a casino should be built in its place!

Pat Kittle

11/12/2007 7:42 PM

i wish they would build a penis enlargement clinic in it's place. we should also deport minorities.

mattie

11/12/2007 8:17 PM

I have been going to the flea market since the 70's. It's a shame that the flea is going away. And to hear that the place was purchased for so little. 14.4-acres at 2260 Soquel Drive had been assessed at just under \$1million.

That sounds unbelievably low! They should have gotten a second opinion. With real estate what it is around here, I would guess the actual value of 14 acres to be more like 3.5 million.

To hell with Sutter! Free health care for all! Ground NASA, stop war funding, waterboard Pat Kittle!

B

11/12/2007 8:49 PM

Mattie,

The assessed value from the county is usually WAY less than the appraised value of a property.

nay

11/12/2007 8:56 PM

I doubt one million is what Sutter paid for the property. Especially since I'm sure the profit from running the flea market and drive in are in the multi millions per year. Given the location, it's worth a lot more than a million to Sutter, also.

I'm so sad to see it go. It was been the lively hood of my family since I was four years old. Even when we moved out of state to buy a house we could afford my Dad still drove and flew down here to sell. I don't know how many times I've driven with him down 1-5 with a huge U-haul full of stuff.

It's been a huge part of my life, I'll miss it.

RONNI BOY

11/12/2007 10:57 PM

I feel like the drive-in and the flea market are two of the only things left of the old Santa Cruz. Going to the drive-in/flea market are two of the only cheap fun things to do in Santa Cruz and represent the community at its best. I wish the city of Santa Cruz would buy it and make it a historical site (last drive-in sort of thing...) Or some really rich person would buy it and restore the drive-in all classical style and run the flea market...

I am so sad!

Today I went to the what is probably the last flea market ever... :(

sucks

Subject: Save the Skyview Drive-in Theater (as of 11-29-07)

Background:

<http://www.santacruzsentinel.com/story.php?sid=44984&storySection=Top+Stories>

Greetings,

On Monday December 3rd the new Santa Cruz Skwiew Drive-in owners will be able to dismantle the drive-in movie screens at the Santa Cruz, California, Skwiew Drive-in theater location. In order to encourage alternative solutions to this loss of one of the few remaining pieces of American Culture of its kind, please list the property on the 'National Register of Historic Places' before December 3rd. This must be done so that CEQA may be triggered as it applies to historic properties. We are asking this as CEQA applies to historic properties when there is a discretionary action associated with an action or a project. For example, if someone applies for a demolition permit, and the local laws allow the permit to be issued automatically, there is no discretion so CEQA review is not triggered. However, if the building is designated and the designation requires the local government to review demolition applications for historic buildings, the project is discretionary and CEQA is triggered. If a proposed demolition is for a replacement project on the site which requires zoning variances or conditional use permits, there is again discretion and CEQA is triggered.

We need you to postpone the property's development (or tell us how this is to be accomplished) until:

- 1) we get a qualified individual, such as a professional historian, historic architect: or architectural historian, who would research the property and prepare material showing that the property meets one of more of the qualifying criteria;
- 2) that material gets reviewed at a public hearing by the County's Historic Resources Commission, which would make a recommendation to the Board of Supervisors and;
- 3) the Board would consider the Commission's recommendation at a public hearing and decide to designate the property as historic or not.

If we are needed to ensure this process takes place, or for any other reason, please don't hesitate to contact me. The following provides a brief history and some of the significant email correspondence we have conducted thus far. What's more, we have available over **11000 signatures and** comments from local people who wish to preserve the Skyview Drive-in theater for future generations.

I wrote the above in light of what Steve Guiney suggested:

Jesse,

If there were an EIR, it would have to consider alternatives and address the potential historic significance of the drive-in. The requirements for designating a structure or structures as historic are listed in County Code Chapter 16.42.080 generally. Section 16.42.080(c) lists the actual designation criteria. In brief, the process would **be** as follows: 1), a qualified individual, typically a professional historian, historic architect, or architectural historian, would research the property and prepare material showing that the property meets one of more of the criteria; 2) that material would be reviewed at a public hearing by the County's Historic Resources Commission, which would make a recommendation to the Board of Supervisors and; 3) the Board would consider the Commission's recommendation at a public hearing and decide to designate the property as historic or not.

11/30/2007

If you want more specific information on this process, please contact Don Bussey here in Planning: he is staff to the Historic Resources Commission.

Steven Guiney. AICP

(831) 454-2131 (fax)

Furthermore, I have been working alongside Angelina Reed, Michael Parisi, and the over 11,000 people who's signatures and comments (see below) show interest in preserving the unique historic past at the Skyview Drive-in theater. For step 1 above we would like to employ Suzi Aratin, Associate Planner of the City of Watsonville as a qualified professional historian. She was an integral part to the challenge of the EIR about the Crossroads Drive-in (restaurant drive-in) that is here in Santa Cruz. Ms. Aratin holds a master's degree in historic preservation from the University of Pennsylvania. We believe she is the type of "historian" qualified **to** make a judgment about the Skyview Drive-In Theater's historical significance? If not, please recommend the right candidate?

Suzi Aratin's related EIR challenge:

<http://www.webspawner.com/users/crossroadsdrivein/helpsavethecros12.html>

We will be looking forward to hearing back from you at your earliest convenience
