TOM BURNS, PLANNING DIRECTOR

February 13, 2008

Planning Commission
County of Santa Cruz
701 Ocean Street
Santa Cruz, CA 95060

Agenda Date: April 9, 2008

APN: 089-511-07,09

Application: 07-0592

Item #: 24

Time: After 9 AM

Subject: A public hearing to consider a proposal to rezone properties from the Special Use (SU) and Residential Agriculture (RA) zone districts to the Timber Production (TP) zone district.

Members of the Commission:

On May 14, 2007, the County Planning Department accepted this application for a rezoning to Timber Production (TP). This is a proposal to rezone 22-acres from the Special Use (SU) and Residential Agriculture zone districts to the Timber Production (TP) designation. The uses on the properties consist of a single family residence and vacant rural acreage.

Background

This project qualifies for a rezoning under California Government Code Section 51113. This section allows a property owner to petition the County to rezone land to the TP zone. The requirements for this type of rezoning are listed in Government Code section 51113(c)¹. The County may not place any additional requirements on this petition to rezone the property to TP. County Code Section 13.10.375(c) – "Zoning to the TP District" implements Government Code section 51113 and specifies the six criteria which must be met in order to rezone to TP.

¹ c) On or before March 1, 1977, the board or council by ordinance shall adopt a list of criteria required to be met by parcels being considered for zoning as timberland production under this section.

The criteria shall not impose any requirements in addition to those listed in this subdivision and in subdivision (d). The following shall be included in the criteria:

- (1) A map shall be prepared showing the legal description or the assessor's parcel number of the property desired to be zoned.
 - (2) A plan for forest management shall be prepared or approved as to content, for the property by a registered professional forester. The plan shall provide for the eventual harvest of timber within a reasonable period of time, as determined by the preparer of the plan.
 - (3) (A) The parcel shall currently meet the timber stocking standards as set forth in Section 4561 of the Public Resources Code and the forest practice rules adopted by the State Board of Forestry and Fire Protection for the district in which the parcel is located, or the owner shall sign an agreement with the board or council to meet those stocking standards and forest practice rules by the fifth anniversary of the signing of the agreement. If the parcel is subsequently zoned as timberland production under subdivision (a), failure to meet the stocking standards and forest practice rules within this time period provides the board or council with a ground for rezoning of the parcel pursuant to Section 51121.
(B) Upon the fifth anniversary of the signing of an agreement, the board shall determine whether the parcel meets the timber stocking standards in effect on the date that the agreement was signed.
- Notwithstanding the provisions of Article 4 (commencing with Section 51130), if the parcel fails to meet the timber stocking standards, the board or council shall immediately rezone the parcel and specify a new zone for the parcel, which is in conformance with the county general plan and whose primary use is other than timberland.
- (4) The parcel shall be timberland, as defined in subdivision (f) of Section 51104.
 - (5) The parcel shall be in compliance with the compatible use ordinance adopted by the board or council pursuant to Section 51111.
 - (d) The criteria required by subdivision (c) may also include any or all of the following:
 - (1) The land area concerned shall be in the ownership of one person, as defined in Section 38106 of the Revenue and Taxation Code, and shall be comprised of single or contiguous parcels of a certain number of acres, not to exceed 80 acres.
 - (2) The land shall be a certain site quality class or higher under Section 434 of the Revenue and Taxation Code, except that the parcel shall not be required to be of the two highest site quality classes.

In accordance with County Code Section 13.10.375(c), the project meets the following six criteria for rezoning to Timber Production:

1. A map has been submitted with the legal description or assessor's parcel number of the property to be rezoned.
2. A Timber Management Plan, undated, prepared by a registered professional forester has been submitted for the property (Exhibit E).
3. The parcel currently meets the timber stocking standards as set forth in Section 4561 of the Public Resources Code and the Forest Practice Rules for the district in which the parcel is located (see Exhibit E).
4. The parcel is timberland, as the entire parcel is capable of producing a minimum of 15 cubic feet of timber per acre annually and is almost entirely located within a mapped Timber Resource area.
5. The uses on the parcel are in compliance with the Timber Production Zone uses set forth in Section 13.10.372.
6. The land area to be rezoned is in the ownership of one person, as defined in Section 38106 of the Revenue and Taxation Code, and is comprised of at least five acres in area.

This project qualifies for a statutory exemption (Exhibit D) in accordance with the California Environmental Quality Act and the County Environmental Review Guidelines (Article 17, Section 1703).

Conclusion

All of the criteria have been met for rezoning this parcel to the Timber Production zoning designation. All required findings can be made to approve this application and the rezoning is consistent with the General Plan policies and land use designations.

Recommendation

Staff recommends that your Commission adopt the attached Resolution (Exhibit A), sending a recommendation to the Board of Supervisors for approval of Application No. 07-0592 based on the attached findings (Exhibit B).

RESOLUTION NO. _____

On the motion of Commissioner
duly seconded by Commissioner
the following Resolution is adopted:

PLANNING COMMISSION RESOLUTION
SENDING RECOMMENDATION TO THE BOARD OF SUPERVISORS
ON PROPOSED AMENDMENT TO THE ZONING ORDINANCE

WHEREAS, the Planning Commission has held a public hearing on Application No.07-0592 involving properties located on the wouth side of Bear Creek Road, approximately three miles east of the intersection with Highway 9, and the Planning Commission has considered the proposed rezoning, all testimony and evidence received at the public hearing, and the attached staff report.

NOW, THEREFORE, BE IT RESOLVED, that the Planning Commission recommends that the Board of Supervisors adopt the attached ordinance amending the Zoning Ordinance by changing properties from the Special Use (SU) and Residential Agriculture (RA) districts to the Timber Production zone district.

BE IT FURTHER RESOLVED, that the Planning Commission makes findings on the proposed rezoning as contained in the Report to the Planning Commission.

PASSED AND ADOPTED by the Planning Commission of the County of Santa Cruz, State of California, this _____ day of _____, 2008, by the following vote:

ORDINANCE NO. _____

**ORDINANCE AMENDING CHAPTER 13
OF THE SANTA CRUZ COUNTY CODE
CHANGING FROM ONE ZONE DISTRICT TO ANOTHER**

The Board of Supervisors of the County of Santa Cruz ordains as follows:

SECTION I

The Board of Supervisors finds that the public convenience, necessity and general welfare require the amendment of the County Zoning Regulations to implement the policies of the County General Plan and Local Coastal Program Land Use Plan regarding the timber resource properties located on the south side of Bear Creek Road, approximately three miles east of the intersection with Highway 9; finds that the zoning to be established herein is consistent with all elements of the Santa Cruz County General Plan and the Santa Cruz County Code, as modified by the *Big Creek* decision; and finds and certifies that the project is subject to a statutory exemption under the California Environmental Quality Act.

SECTION II

The Board of Supervisors hereby adopts the Zoning Plan Amendment as described in Section III, and adopts the findings in support thereof without modification as set forth below:

1. The proposed zone district will allow a density of development and types of uses which are consistent with the objectives and land use designations of the adopted General Plan; and
1. The proposed zone district is appropriate for the level of utilities and community services available to the land; and
2. The character of development in the area where the land is located has changed or is changing to such a degree that the public interest will be better served by a different zone district; and
3. The property meets the requirements of Government Code section 51113 or 51113.5 and County Code Section 13.10.375(c).

SECTION III

Chapter 13.10 - Zoning Regulations of the Santa Cruz County Code is hereby amended by amending Section 13.10.210 - Zoning Plan to change the following properties from the existing zone district to the new zone district as follows:

<u>Assessor's Parcel Number</u>	<u>Existing Zone District</u>	<u>New Zone District</u>
089-511-07	Residential Agriculture (RA)	TP
089-511-09	Special Use (SU) & Residential Agriculture (RA)	TP

SECTION IV

This ordinance shall take effect on the 31st day after the date of final passage.

PASSED AND ADOPTED THIS _____ day of _____ 2008, by the Board of Supervisors of the County of Santa Cruz by the following vote:

Portion of Section 9, 10
Township 9 South
Range 2 West
Mount Diablo Base & Meridian**

**Report Prepared By
Joseph Culver, Consulting Forester
October 31, 2007**

PREFACE

In September 2007, Joseph Culver, Consulting Forester, was commissioned by Herman Sari to prepare a Timber Management Plan (TMP) for parcel #'s 089-511-07 and 089-511-09. The county assessor lists the parcels as totaling 22.2 acres in size. Mr. Sari would like to rezone the parcels to Timber Production and the TMP will be part of the application packet submitted to the County of Santa Cruz. The management plan incorporates field work and currently available resource data.

GENERAL PROPERTY DESCRIPTION

The property is located on the south side of Bear Creek Road approximately 2.5 miles northeast of the community of Boulder Creek. Bear Creek flows through the northern portion of the property. The majority of the property is located on a steeply sloping hillside to the south of Bear Creek. The slopes become gentler in the southeast portion of the property as the hillside rounds off into a broad ridge.

Elevation ranges from 680 feet along Bear Creek to 1,240 feet along the ridge in the southern portion of the property. The legal description of the property is Township 9 South, Range 2 West, portion of section 9, 10. Timber site classification throughout the timbered portions of the property is site III.

Approximately 15 acres of the property is comprised of coniferous forest. Medium sized second growth coastal redwood and Douglas-fir is the dominant tree type of the forest. As is typical with this species, the redwood trees tend to grow in groves throughout the property while individual Douglas-fir trees are scattered through the property. The majority of the conifer trees are located near Bear Creek, in a steeply sloping canyon along the northeast property line and near the southern boundary in several large groves. Hardwood species of tanoak, madrone and coastal live oak are interspersed through the coniferous stand, primarily as an intermediate species. The hardwood species are the dominant forest tree in some areas of the property, particularly along the upper slopes of the steep hillside. Understory vegetation is typical for redwood forests in the Santa Cruz Mountains and includes tanoak seedlings, bracken fern, sword fern, California blackberry, poison oak, bunch grasses and clover

The remaining 7.2 acres of the property is comprised of hardwood stands, brush fields, openings with no forest cover and the home site.

Two acres of the property near Bear Creek are underlain by the Ben Lomond sandy loam. This very deep, moderately drained soil formed from sandstone, granitic rock or in alluvium. Permeability is moderately rapid and effective rooting depth of the soil is 60 inches. Surface runoff is medium, and the hazard of erosion is moderate. According to the Natural Resources Conservation Service, the soil is well suited to the production of timber.

The remainder of the timbered portion of the property is underlain by the Ben Lomond-Catelli-Sur Complex. These soils are deep and well drained, with sandy loam surface soils of about 7-19" in thickness. Weathered sandstone is found at 37-46". Permeability is moderately rapid, and effective rooting depth is 20-40". Runoff is rapid to very rapid, and the erosion hazard is high to very high. These soils are well suited to timber production.

TIMBER HARVEST HISTORY

The old-growth redwood logging in the Santa Cruz area, including this property, occurred approximately 110 years ago. As was common throughout the area, this clear-cut logging was often followed by fire, usually intentionally set to burn bark and slash. Fire scars on the old-growth stumps are evidence of this fire activity. The property does not appear to have been commercially harvested since the original clear-cut.

MANAGEMENT OBJECTIVES AND GOALS

Mr. Sari intends to manage the property for high quality forest products, while enhancing the related values of aesthetics and wildlife. As the property has not been harvested for approximately 100 years, the next harvest could occur anytime in the near future. Although State law allows for a harvest every 10 years, due to the small size of the timbered area it is recommended that future harvesting be spaced at a 15-20 year interval to maximize the volume removed in each harvest, and to minimize neighborhood impacts. Future harvests should focus on the following objectives:

1. Prescribe and implement a forest improvement program to improve stocking, increase tree vigor and maximize growth.
2. Maintain a healthy and vigorous forest of well-spaced trees growing at the highest rates feasible considering the other values of the forest.
3. Maintain a high degree of aesthetic consideration during all aspects of forest management.
4. Maintain wildlife habitat as part of continuing forest management.

RECOMMENDED LOGGING SYSTEM

As the property has not been commercially harvested for over 100 years, appropriate harvesting infrastructure would be developed during preparation of a Timber Harvest Plan.

PRESENT AND FUTURE STAND CONDITIONS

In October 2007, a 5% timber inventory was conducted on the property to determine conifer volume per acre, species composition, basal area, stocking levels and stand

growth. The stand data gathered from this inventory, combined with on-site observations made by the professional forester preparing this report, show that the 15 acres of coniferous forest have the following approximate stand conditions:*

Species Composition	78% redwood, 22% Douglas-fir
Basal Area	78 square feet per acre
Gross Volume/acre (redwood)	9,700 board feet
Gross Volume/acre (Douglas-fir)	2,700 board feet
Gross Overall property volume	186,000 board feet

The volume per acre and overall property volume stated above are gross volumes. In general, the net volume for redwood will be about 10% less due to fire scar, rot and other minor defects in the standing timber. The defect in the Douglas-fir is higher due to the presence of conk in many of the butt logs and is estimated at 15%. With these factors in mind the overall net conifer volume on the property is approximately 165,400 board feet.

Increment boring data gathered during the timber inventory combined with general tree growth rates in the Santa Cruz Mountains indicate that the conifer component of the forest is growing at an approximate rate of 2.8% per year. A growth rate of 2.8% per year equates to an annual increase in the conifer resource of 5,208 board feet over the entire property. Converting this figure to cubic feet gives a current growth rate of 434 cubic feet over the entire property, or 20 cubic feet per acre per year. This exceeds the required average of 15 cubic feet per acre per year to classify a property as timberland.

**Limitation: This data is based on a field sample and an extrapolated growth rate for the previous ten years. This data should only be used as a guide for management purposes, and should not be extended or taken out of context for other purposes.*

OTHER PROPERTY USES

The existing home on APN# 089-511-07 is currently being fixed up by Mr. Sari and will be used either as a residence for Mr. Sari or as a rental property. APN# 089-511-09 contains no structures and is currently used as watershed and wildlife habitat.

CONCLUSION

The property is suited for timber management into the future. Mr. Sari has indicated that he wants to preserve his right to manage the timber resource and stand conditions warrant a harvest in the near future.

TIMBER STOCKING: To rezone a property to the "Timber Production" zoning a property must meet the timber stocking standards set forth in Section 4561 of the Public Resources Code. Section 4561 states in part that "The average residual basal area, measured in stems one inch or larger in diameter.....in areas which the

registered professional forester has determined are site II classification or lower, the minimum average residual basal area shall be 50 square feet per acre. Rock outcroppings and other areas not normally bearing timber shall not be considered as requiring stocking." The average residual conifer basal area in the timbered portions of the property is 78 square feet and therefore meets the stocking standards.

TIMBERLAND: To rezone a property to the "Timber Production" zoning a property must meet the definition of timberland. Section 51104 of the California Code states that "Timberland means privately owned land.....capable of growing an average annual volume of wood fiber of at least 15 cubic feet per acre." The property proposed for rezoning is capable of growing an annual average volume of coniferous wood fiber of 20 cubic feet per acre and therefore meets the definition of timberland.

COMPATIBLE USE: Existing infrastructure on the properties does not significantly detract from the use of the property for, or inhibit, growing and harvesting timber.
