**TOM BURNS, PLANNING DIRECTOR**

February 11, 2008

Planning Commission  
County of Santa Cruz  
701 Ocean Street  
Santa Cruz, CA 95060

**Agenda Date:** March 12, 2008

**APN:** 106-251-01

**Application:** 07-0508

**Item #:** 36

**Time:** After 9 AM

**Subject: A public hearing to consider a proposal to rezone one parcel from the Special Use (SU) zone district to the Timber Production (TP) zone district.**

Members of the Commission:

On September 11, 2007, the County Planning Department accepted this application for a rezoning to Timber Production (TP). This is a proposal to rezone 23.2 acres from the Special Use (SU) zone district to the Timber Production (TP) zone district. The uses on the property consist of vacant rural acreage.

### Background

This project qualifies for a rezoning under California Government Code Section 51113. This section allows a property owner to petition the County to rezone land to the TP zone. The requirements for this type of rezoning are listed in Government Code section 51113(c)<sup>1</sup>. The County may not place any additional requirements on this petition to rezone the property to TP. County Code Section 13.10.375(c) – “Zoning to the TP District” implements Government Code section 51113 and specifies the six criteria which must be met in order to rezone to TP.

<sup>1</sup> c) On or before March 1, 1977, the board or council by ordinance shall adopt a list of criteria required to be met by parcels being considered for zoning as timberland production under this section.

The criteria shall not impose any requirements in addition to those listed in this subdivision and in subdivision (d). The following shall be included in the criteria:

(1) A map shall be prepared showing the legal description or the assessor's parcel number of the property desired to be zoned.

(2) A plan for forest management shall be prepared or approved as to content, for the property by a registered professional forester.

The plan shall provide for the eventual harvest of timber within a reasonable period of time, as determined by the preparer of the plan.

(3) (A) The parcel shall currently meet the timber stocking standards as set forth in Section 4561 of the Public Resources Code and the forest practice rules adopted by the State Board of Forestry and Fire Protection for the district in which the parcel is located, or the owner shall sign an agreement with the board or council to meet those stocking standards and forest practice rules by the fifth anniversary of the signing of the agreement. If the parcel is subsequently zoned as timberland production under subdivision (a), failure to meet the stocking standards and forest practice rules within this time period provides the board or council with a ground for rezoning of the parcel pursuant to Section 51121.

(B) Upon the fifth anniversary of the signing of an agreement, the board shall determine whether the parcel meets the timber stocking standards in effect on the date that the agreement was signed.

Notwithstanding the provisions of Article 4 (commencing with Section

51130), if the parcel fails to meet the timber stocking standards, the board or council shall immediately rezone the parcel and specify a new zone for the parcel, which is in conformance with the county general plan and whose primary use is other than timberland.

(4) The parcel shall be timberland, as defined in subdivision (f) of Section 51104.

(5) The parcel shall be in compliance with the compatible use ordinance adopted by the board or council pursuant to Section 51111.

(d) The criteria required by subdivision (c) may also include any or all of the following:

(1) The land area concerned shall be in the ownership of one person, as defined in Section 38106 of the Revenue and Taxation Code, and shall be comprised of single or contiguous parcels of a certain number of acres, not to exceed 80 acres.

(2) The land shall be a certain site quality class or higher under Section 434 of the Revenue and Taxation Code, except that the parcel shall not be required to be of the two highest site quality classes.

In accordance with County Code Section 13.10.375(c), the project meets the following six criteria for rezoning to Timber Production:

1. A map has been submitted with the legal description or assessor's parcel number of the property to be rezoned.
2. A Timber Management Plan, undated, prepared by a registered professional forester has been submitted for the property (Exhibit E).
3. The parcel currently meets the timber stocking standards as set forth in Section 4561 of the Public Resources Code and the Forest Practice Rules for the district in which the parcel is located (see Exhibit E).
4. The parcel is timberland, as the entire parcel is capable of producing a minimum of 15 cubic feet of timber per acre annually and is almost entirely located within a mapped Timber Resource area.
5. The uses on the parcel are in compliance with the Timber Production Zone uses set forth in Section 13.10.372.
6. The land area to be rezoned is in the ownership of one person, as defined in Section 38106 of the Revenue and Taxation Code, and is comprised of at least five acres in area.

This project qualifies for a statutory exemption (Exhibit D) in accordance with the California Environmental Quality Act and the County Environmental Review Guidelines (Article 17, Section 1703).

**Conclusion**

All of the criteria have been met for rezoning the parcel to the Timber Production zoning designation. All required findings can be made to approve this application and the rezoning is consistent with the General Plan policies and land use designations.

**Recommendation**

Staff recommends that your Commission adopt the attached Resolution (Exhibit A), sending a recommendation to the Board of Supervisors for approval of Application No. 07-0508 based on the attached findings (Exhibit B).

BEFORE THE PLANNING COMMISSION  
OF THE COUNTY OF SANTA CRUZ, STATE OF CALIFORNIA

RESOLUTION NO. \_\_\_\_\_

On the motion of Commissioner  
duly seconded by Commissioner  
the following Resolution is adopted:

PLANNING COMMISSION RESOLUTION  
SENDING RECOMMENDATION TO THE BOARD OF SUPERVISORS  
ON PROPOSED AMENDMENT TO THE ZONING ORDINANCE

WHEREAS, the Planning Commission has held a public hearing on Application No. 07-0508, involving property located on the south side of Eureka Canyon Road, at the intersection with Buzzard Lagoon Road, and the Planning Commission has considered the proposed rezoning, all testimony and evidence received at the public hearing, and the attached staff report.

NOW, THEREFORE, BE IT RESOLVED, that the Planning Commission recommends that the Board of Supervisors adopt the attached ordinance amending the Zoning Ordinance by changing property from the Special Use (SU) zone district to the Timber Production (TP) zone district.

BE IT FURTHER RESOLVED, that the Planning Commission makes findings on the proposed rezoning as contained in the Report to the Planning Commission.

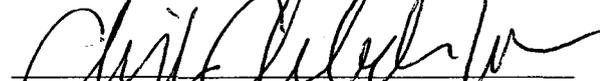

PASSED AND ADOPTED by the Planning Commission of the County of Santa Cruz, State of California, this \_\_\_\_\_ day of \_\_\_\_\_, 2008, by the following vote:

ORDINANCE NO. \_\_\_\_\_

**ORDINANCE AMENDING CHAPTER 13  
OF THE SANTA CRUZ COUNTY CODE  
CHANGING FROM ONE ZONE DISTRICT TO ANOTHER**

---

The Board of Supervisors of the County of Santa Cruz ordains as follows:

**SECTION I**

The Board of Supervisors finds that the public convenience, necessity and general welfare require the amendment of the County Zoning Regulations to implement the policies of the County General Plan and Local Coastal Program Land Use Plan regarding the timber resource property located on the south side of Eureka Canyon Road, at the intersection with Buzzard Lagoon Road; finds that the zoning to be established herein is consistent with all elements of the Santa Cruz County General Plan and the Santa Cruz County Code, as modified by the *Big Creek* decision; and finds and certifies that the project is subject to a statutory exemption under the California Environmental Quality Act.

**SECTION II**

The Board of Supervisors hereby adopts the Zoning Plan Amendment as described in Section III, and adopts the findings in support thereof without modification as set forth below:

1. The proposed zone district will allow a density of development and types of uses which are consistent with the objectives and land use designations of the adopted General Plan; and
1. The proposed zone district is appropriate for the level of utilities and community services available to the land; and
2. The character of development in the area where the land is located has changed or is changing to such a degree that the public interest will be better served by a different zone district; and
3. The property meets the requirements of Government Code section 51113 or 51113.5 and County Code Section 13.10.375(c).

**SECTION III**

Chapter 13.10 - Zoning Regulations of the Santa Cruz County Code is hereby amended by amending Section 13.10.210 - Zoning Plan to change the following properties from the existing zone district to the new zone district as follows:

<u>Assessor's Parcel Number</u>	<u>Existing Zone District</u>	<u>New Zone District</u>
106-251-01	Special Use (SU)	TP

**SECTION IV**

This ordinance shall take effect on the 31<sup>st</sup> day after the date of final passage.

PASSED AND ADOPTED THIS \_\_\_\_\_ day of \_\_\_\_\_ 2008, by the Board of Supervisors of the County of Santa Cruz by the following vote:

# CALIFORNIA ENVIRONMENTAL QUALITY ACT NOTICE OF EXEMPTION

The Santa Cruz County Planning Department has reviewed the project described below and has determined that it is exempt from the provisions of CEQA as specified in Sections 15061 - 15332 of CEQA for the reason(s) which have been specified in this document.

Application Number: 07-0508

Assessor Parcel Number: 106-251-01

Project Location: Property located on the south side of Eureka Canyon Road, at the intersection with Buzzard Lagoon Road

**Project Description: Rezone a parcel from the Special Use (SU) zone district to the Timber Production (TP) zone district.**

**Person or Agency Proposing Project: James Michael Elliott**

**Contact Phone Number: (831) 423-0678**

- A.  The proposed activity is not a project under CEQA Guidelines Section 15378.
- B.  The proposed activity is not subject to CEQA as specified under CEQA Guidelines Section 15060 (c).
- C.  **Ministerial Project** involving only the use of fixed standards or objective measurements without personal judgment.
- D.  **Statutory Exemption** other than a Ministerial Project (CEQA Guidelines Section 15260 to 15285). [Section 1703]

In addition, none of the conditions described in Section 15300.2 apply to this project.

**Timber Management Plan**

**Lands of Elliott  
Eureka Canyon Road  
Watsonville, CA**

**APN# 106-251-01  
Portion of Section 14  
Township 10 South  
Range 1 East  
Mount Diablo Base & Meridian**

**Report Prepared By  
Joseph Culver, Consulting Forester  
August 23, 2007**

## **PREFACE**

In August 2007, Joseph Culver, Consulting Forester, was commissioned by James Elliott to prepare a Timber Management Plan for APN #106-251-01. The county assessor lists the parcel as 23.2 acres in size. Mr. Elliott would like to rezone the parcel to Timber Production and the TMP will be part of an application packet submitted to the County of Santa Cruz. The management plan incorporates field work and currently available resource data.

## **GENERAL PROPERTY DESCRIPTION**

The parcel is located approximately six miles north of Corralitos at the upper intersection of Eureka Canyon Road and Buzzard Lagoon Road. The property is located in the Corralitos Creek Watershed. The property is generally defined as a valley in which the headwaters of Corralitos Creek flow southeast. Hillsides slope up steeply from both sides of the creek. As the hillsides climb away from the creek, slopes become gentler, particularly in the southern portion of the property. The northeastern edge of the property is located along Eureka Canyon Road.

Elevation ranges from 1760 feet where Corralitos Creek leaves the property to 2,050 feet in the southern portion. The legal description of the parcel is Township 10 South, Range 1 East, portion of section 14. Timber site classification throughout the property is site III. Average site III lands are present along the watercourse and in the southern portion of the property and low site III exists below Eureka Canyon Road.

Soils on the property consist of the Lompico-Felton complex. Permeability of the Lompico soil is moderate and effective rooting depth is 20 to 40 inches. Runoff is medium or rapid, and the hazard of erosion is moderate or high. The Felton soil is deep and well drained and formed in residuum derived from sandstone, shale, siltstone, or schist. Permeability of the Felton soil is moderately slow and effective rooting depth is 40 to 72 inches. These soils are well suited to the production of redwood and Douglas fir.

The entire 23.2 acres of the property is forested. The forest on the property is generally described as a second growth redwood and Douglas-fir forest with a high component of hardwood, particularly tanoak, interspersed throughout the stand. The redwood tends to grow near Corralitos Creek and other swales and small valleys on the property. The heaviest component of redwood is located in the southern portion of the property. Scattered Douglas-fir can be found either singly or in small groups throughout the property.

Besides the abundant tanoaks, other hardwood species include Pacific Madrone and coastal live oak. Hardwood species are the dominant forest tree in some areas of the property, particularly below Eureka Canyon Road and middle slopes southwest of Corralitos Creek. Understory species on the property consist mostly of tanoak seedlings, poison oak, ceanothus and bunch grasses.

## **TIMBER HARVEST HISTORY**

The old-growth redwood logging in the Santa Cruz area, including this property, occurred approximately 110 years ago. As was common throughout the area, this clear-cut logging was often followed by fire, usually intentionally set to burn bark and slash. Fire scars on the old-growth stumps are evidence of this fire activity.

Based on stumps observed in the field, it appears that the next harvest occurred on the property in the early 1980's. This selective harvest removed approximately 50-60% of the larger second growth trees.

## **MANAGEMENT OBJECTIVES AND GOALS**

Once the property is rezoned, Mr. Elliott intends to manage the forest land for high quality forest products, while enhancing the related values of aesthetics and wildlife. Although there has been no harvesting on the property for approximately 25 years, the property contains a number of well-spaced smaller diameter trees. Some redwood clumps, particularly in the southern portion of the property, could be immediately thinned, but in general, the redwood forest is still productively growing and Mr. Elliott may want to wait five to ten years before conducting a harvest.

Although State law allows for a harvest every 10 years, due to the small size of the timbered area it is recommended that future harvesting be spaced at a 15-20 year interval to maximize the volume removed in each harvest, and to minimize neighborhood impacts. Future harvests should focus on the following objectives:

1. Prescribe and implement a forest improvement program to improve stocking, increase tree vigor and maximize growth.
2. Maintain a healthy and vigorous forest of well-spaced trees growing at the highest rates feasible considering the other values of the forest.
3. Maintain a high degree of aesthetic consideration during all aspects of forest management.
4. Maintain and improve wildlife habitat where possible as part of continuing forest management.

## **RECOMMENDED LOGGING SYSTEM**

The recommended logging system for this property is to use ground based logging equipment such as tractors and log skidders. Appropriate harvesting infrastructure would be developed during preparation of a Timber Harvest Plan.

## **PRESENT AND FUTURE STAND CONDITIONS**

In August of 2007 an 8% timber inventory was conducted on the property to determine conifer volume per acre, species composition, basal area, stocking levels and stand growth. Based on the stand data gathered from the inventory, the 23.2 acres of forest land have the following approximate stand conditions:\*

Species Composition	82% second growth redwood 18% Douglas-fir
Basal Area	95 square feet per acre
Gross Volume/acre	10,900 board feet
Gross Overall property volume	252,900 board feet

The volume per acre and overall property volume stated above are gross volumes. In general, the net volume for redwood will be about 10% less due to fire scar, rot and other minor defects in the standing timber. The defect in the Douglas-fir is higher due to the presence of conk in many of the butt logs and is estimated at 15%. With these factors in mind the overall net conifer volume on the property is approximately 225,300 board feet.

Increment boring data gathered during the timber inventory combined with general tree growth rates in the Santa Cruz Mountains indicate that the conifer component of the forest is growing at an approximate rate of 2.8% per year. This growth rate is about average for managed stands of second growth trees. A growth rate of 2.8% per year equates to an annual increase in the forest resource of 7,080 board feet over the entire property. Converting this figure to cubic feet gives a current growth rate of 590 cubic feet over the entire property, or 25 cubic feet per acre per year. This exceeds the required average of 15 cubic feet per acre per year to classify a property as timberland.

*\*Limitation: This data is based on a field sample and an extrapolated growth rate for the previous ten years. This data should only be used as a guide for management purposes, and should not be extended or taken out of context for other purposes.*

## **OTHER PROPERTY USES**

A year round gravel road travels through the property to access residences beyond the subject property. There are no structures on the property.

## **CONCLUSION**

The property is well suited for timber management into the future. The property has been selectively managed for second growth timber in the past and the forest resource is currently healthy and experiencing a good growth rate. Mr. Elliott has

indicated that he wants to manage the timber resource and stand conditions warrant a harvest within the next five to ten years.

**TIMBER STOCKING:** To rezone a property to the "Timber Production" zoning a property must meet the timber stocking standards set forth in Section 4561 of the Public Resources Code. Section 4561 states in part that "The average residual basal area, measured in stems one inch or larger in diameter.....in areas which the registered professional forester has determined are site II classification or lower, the minimum average residual basal area shall be 50 square feet per acre. Rock outcroppings and other areas not normally bearing timber shall not be considered as requiring stocking." The average residual basal area in the timbered portions of the property is 95 square feet and therefore meets the stocking standards.

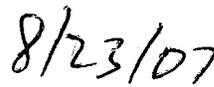

**TIMBERLAND:** To rezone a property to the "Timber Production" zoning a property must meet the definition of timberland. Section 51104 of the California Code states that "Timberland means privately owned land.....capable of growing an average annual volume of wood fiber of at least 15 cubic feet per acre." The property proposed for rezoning is capable of growing an annual average volume of wood fiber of 25 cubic feet per acre and therefore meets the definition of timberland.

**COMPATIBLE USE:** Existing infrastructure on the properties does not significantly detract from the use of the property for, or inhibit, growing and harvesting timber.
