HISTORY

Application was accepted on August 14th, 2003 and deemed complete on September 14th, 2003.

ANALYSIS AND DISCUSSION

The subject property is a 76,127 square foot lot (1.75 acres EMIS estimate), located in the RA (Residential Agriculture) zone district, a designation which allows single-family residential uses. The proposed fence is a permitted use within the zone district and the project is consistent with the site's (R-R) Rural Residential General Plan designation. The proposed fence is sited and designed to be visually compatible, in scale with, and integrated with the character of the surrounding neighborhood. Developed parcels in the area contain rural single-family dwellings. Sizes and architectural styles of fences vary widely in the area, and the design submitted is not inconsistent with the existing range.

The applicant proposes to construct an 8-foot high fence bordering Assessors Parcel Numbers 103-081-02 and 103-081-127 along a shared easement along Olive Springs Road and a 3-foot solid wood fence along the frontage portion of the parcel. The proposed 8-foot high portion of proposed fence is to provide additional privacy from activities on parcel 103-081-127 including the neighbor's use of a car lift to repair automobiles. The car lift on the adjacent parcel raises cars approximately 10-feet in the air. The proposed 8-foot high fence will provide the parcel owner additional screening and privacy from this use. The proposed 8-foot high fence will run along the western portion of the property ending at the rear of the parcel.

The application originally requested that the initial 20-foot section of the shared easement and the frontage portion of the parcel include a 5-foot high solid wood fence. After a site visit to the property and careful analysis by planning staff, it was determined that the proposed 5-foot portion of the wood fence would create line of sight impacts. Staff recommended that the applicant either relocate the 5-foot high portion of the fence closer to the existing single-family residence or lower the proposed height of that portion of the fence to prevent potential of line of

sight impacts. The applicant resubmitted plans on April 5th, 2004, and now proposes to lower the fence along the front portion of the parcel along Olive Springs Road and along the first 12-foot section of the easement to 3-feet. Lowering the proposed height from 5-feet to 3-feet along **this** portion of the property will allow vehicles using the shared easement adequate sight distance entering and leaving the shared access easement off of Olive Springs Road.

County Code, Section 13.10.525 (b) states “the purpose **of** a fence and/or retaining wall regulations for side and rear yards which do not abut on streets are to provide for privacy screening of these yards. The proposed 8-foot high portion of the fence in the side yard setbacks is an allowed use with the Zoning Administrators approval, and will provide privacy and buffer noise **from** the adjacent property.

As proposed and conditioned, the project is consistent with all applicable codes and policies of the Zoning Ordinance and General Plan/LCP. Please *see* Exhibit “B” (“Findings”) for a complete listing of findings and evidence related to the above discussion.

RECOMMENDATION

Staff recommends:

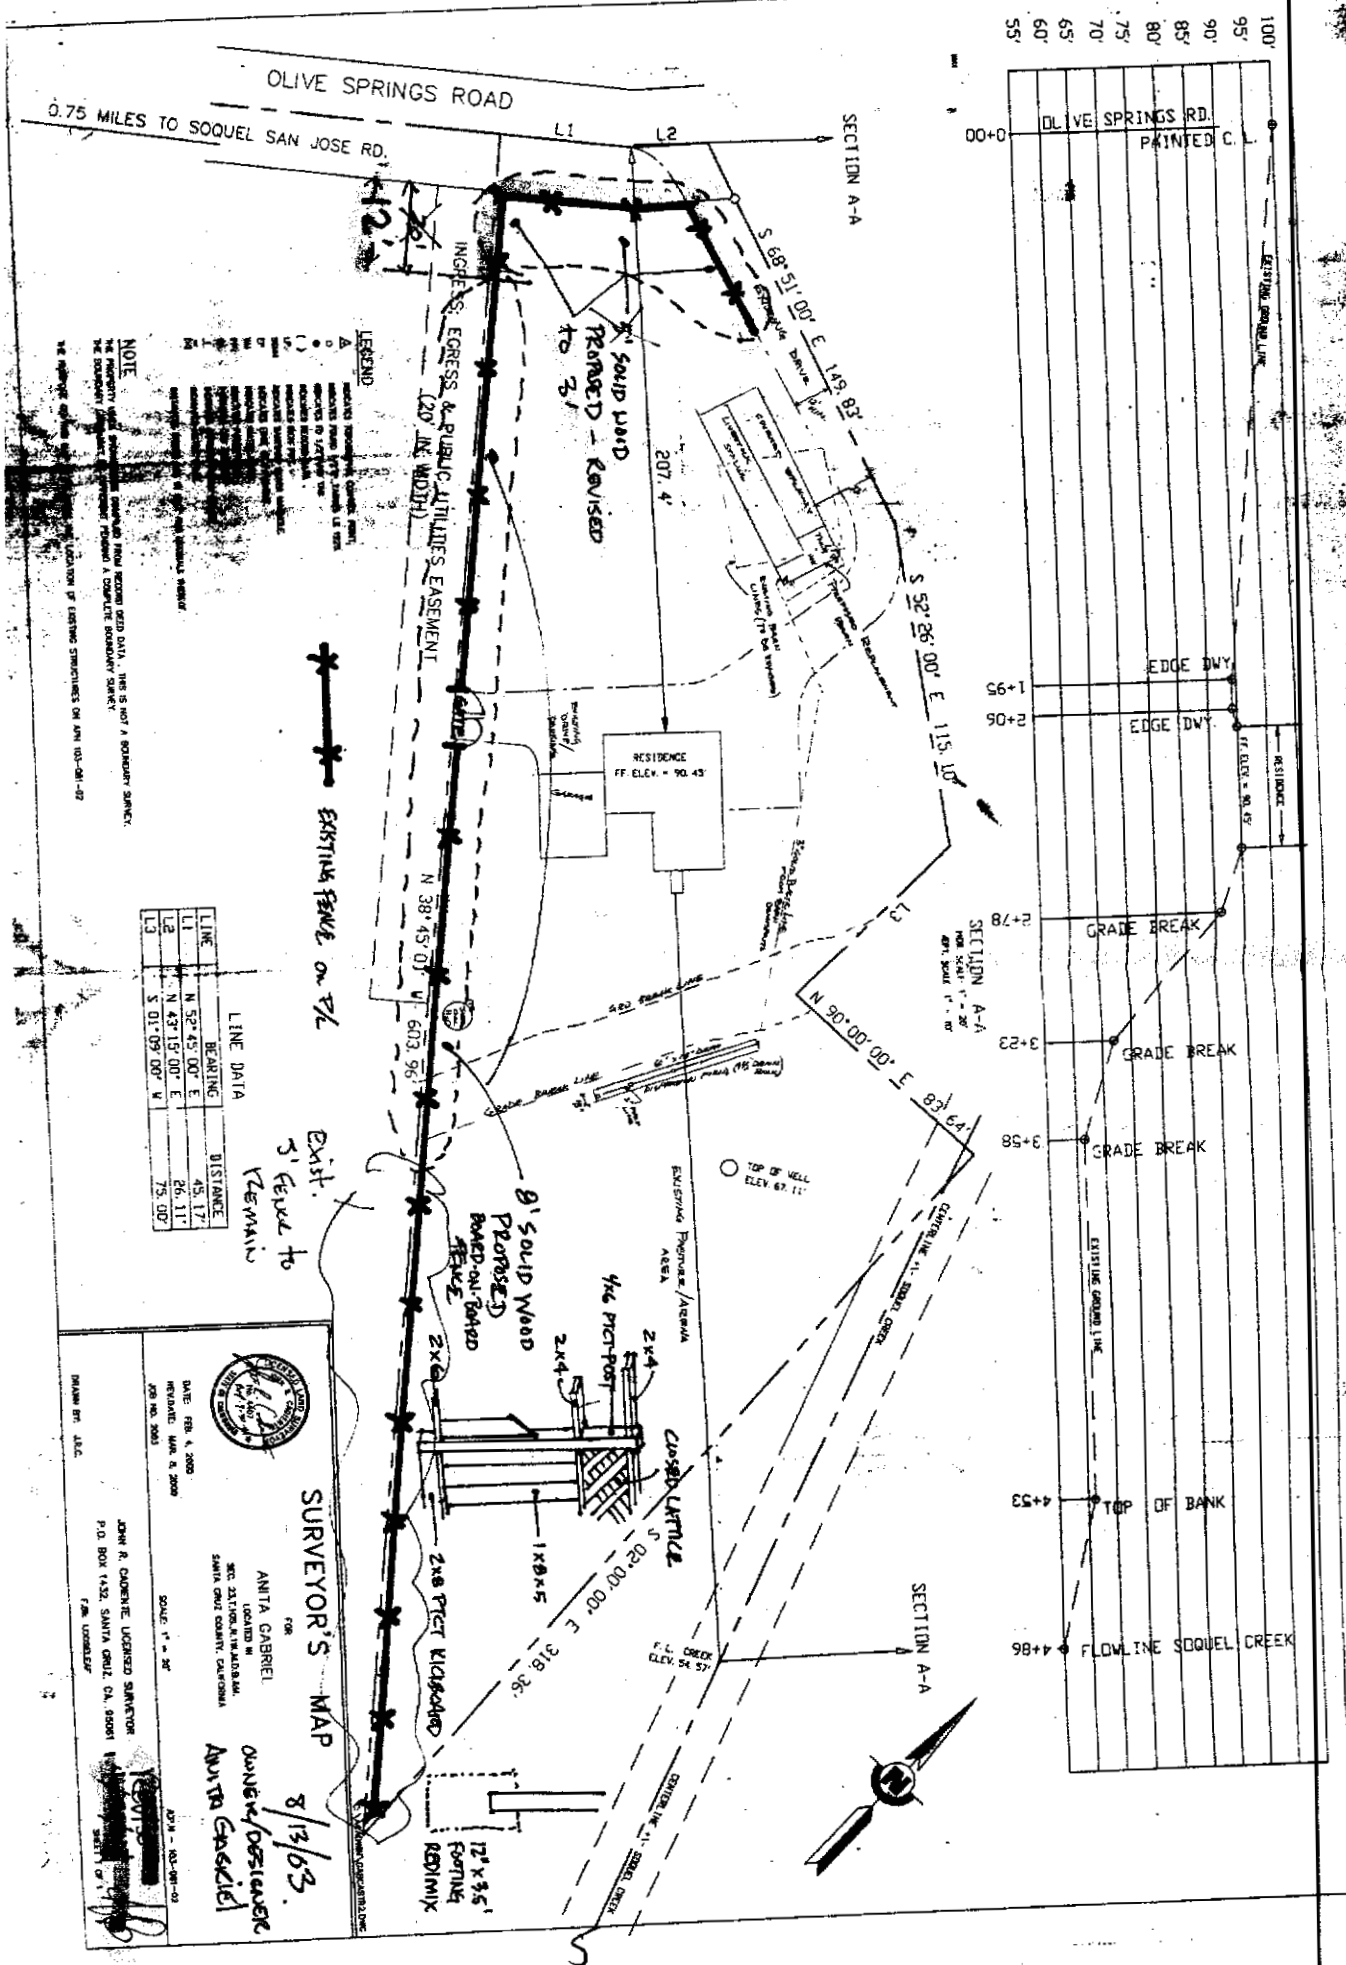

1. Certification that the proposal is exempt from further Environmental Review under the California Environmental Quality Act.
2. **APPROVAL** of Application Number **03-0335**, based on the attached findings and conditions.

DEVELOPMENT PERMIT FINDINGS:

1. THAT THE PROPOSED LOCATION OF THE PROJECT AND THE CONDITIONS UNDER WHICH IT WOULD BE OPERATED OR MAINTAINED WILL NOT BE DETRIMENTAL TO THE HEALTH, SAFETY, OR WELFARE OF PERSONS RESIDING OR WORKING IN THE NEIGHBORHOOD OR THE GENERAL PUBLIC, AND WILL NOT RESULT IN INEFFICIENT OR WASTEFUL USE OF ENERGY, AND WILL NOT BE MATERIALLY INJURIOUS TO PROPERTIES OR IMPROVEMENTS IN THE VICINITY.

The location of the proposed fence as conditioned will not be detrimental to the health, safety, or welfare of persons residing or working in the neighborhood or the general public, and will not be materially injurious to properties in the vicinity since the project is a fence that will not impact neighbor's access to light and air. Construction will comply with the Uniform Building Code and the County Building ordinance to insure the optimum in safety.

2. THAT THE PROPOSED LOCATION OF THE PROJECT AND THE CONDITIONS UNDER WHICH IT WOULD BE OPERATED OR MAINTAINED WILL BE CONSISTENT WITH ALL PERTINENT COUNTY ORDINANCES AND THE PURPOSE OF THE ZONE DISTRICT IN WHICH THE SITE IS LOCATED.

The project site is located in the RA (Residential Agriculture) zone district. The proposed eight-foot high fence as conditioned will be consistent with all pertinent County ordinances, including Section **13.10.525**, regulations for fences and retaining walls. Specifically, the proposed fence will meet the purposes of the fence and retaining wall regulations in that it will provide privacy screening for the subject property and will not cause any line of sight or sight distance impacts.

3. THAT THE PROPOSED USE IS CONSISTENT WITH ALL ELEMENTS OF THE COUNTY GENERAL PLAN AND WITH ANY SPECIFIC PLAN WHICH HAS BEEN ADOPTED FOR THE AREA.

The project is located in the Rural Residential (R-R) land use designation. The proposed single-family residential use is consistent with the General Plan in that it meets the density requirements specified in General Plan Objective (Rural Residential).

The proposed eight-foot high fence as conditioned will not adversely impact the light, solar opportunities, air, and open space available to other structures or properties, since the eight-foot portion of the fence will be at least twenty feet from any adjacent structures

The proposed eight-foot high fence as conditioned will not be improperly proportioned to the parcel size or the character of the neighborhood as specified in General Plan Policy **8.6.1** (Maintaining a Relationship Between Structure and Parcel Sizes).

A specific plan has not been adopted for this portion of the County

4. THAT THE PROPOSED USE WILL NOT OVERLOAD UTILITIES AND WILL NOT GENERATE MORE THAN THE ACCEPTABLE LEVEL OF TRAFFIC ON THE STREETS IN THE VICINITY.

The proposed eight-foot high fence will not use any utilities nor will it generate any traffic.

5. THAT THE PROPOSED PROJECT WILL COMPLEMENT AND HARMONIZE WITH THE EXISTING AND PROPOSED LAND USES IN THE VICINITY AND WILL BE COMPATIBLE WITH THE PHYSICAL DESIGN ASPECTS, LAND USE INTENSITIES, AND DWELLING UNIT DENSITIES OF THE NEIGHBORHOOD.

The proposed eight foot high fence will complement and harmonize with the existing residential character of the neighborhood since it will be located along the rear portion of the subject property on the southern property line, a location where fences are common to insure privacy. The fence will be compatible with the physical design aspects of the neighborhood since it will be a wood board fence with a one-foot lattice on top, typical of many fences in the neighborhood.

6. THE PROPOSED DEVELOPMENT PROJECT IS CONSISTENT WITH THE DESIGN STANDARDS AND GUIDELINES (SECTIONS 13.11.070 THROUGH 13.11.076), AND ANY OTHER APPLICABLE REQUIREMENTS OF THIS CHAPTER.

This project does not require design review.
